

AnyCompany Smart Home - Returns & Warranty Policy

Effective August 2026 - v3

1. Return window

Most devices may be returned within 30 days of delivery for a full refund. Smart Locks and Doorbell Cameras have a 14-day return window because they are security devices. Opened consumable accessories (batteries, filters) are non-returnable once opened.

2. Condition required

Items must be returned in original packaging with all included accessories. A device that has been physically damaged by the customer is not eligible for a refund but may qualify for warranty repair. Devices reset to factory defaults process faster.

3. How refunds are issued

Refunds go back to the original payment method and take three to five business days to appear after the item is received at our warehouse. Orders that have shipped but not yet been delivered can be refused at delivery; orders still processing can be cancelled outright for a faster refund.

4. Warranty

All devices carry a two-year standard warranty covering manufacturing defects. The warranty does not cover accidental damage, water damage beyond the device IP rating, or damage from unauthorized modification. Warranty claims require the order number and proof of purchase.

5. Damaged or defective on arrival

If a device arrives damaged or defective, report it within 48 hours for a free replacement with prepaid return shipping. Photos of the damage speed up the claim. Replacements ship within two business days of the claim being approved.

6. Return shipping cost

Returns for a change of mind are paid by the customer. Returns for a defective, damaged, or incorrect item are paid by AnyCompany with a prepaid label emailed to the customer.
